EXPERIENCES

COBLI | SOFTWARE ENGINEER INTERN

Jul 2019 – Dec 2019

- Software Engineer at the **Big Data** team, worked with streaming data, dealing with databases (Cassandra) and data *pipelines*.
- Used **Apache Flink and Kafka**, some tools from **AWS** (S3, ECS, Cloudwatch, Cloudformation) and agile methods, such as scrum. **Scala** was the main language.

ITAÚ | SOFTWARE ENGINEER INTERN (SUMMER JOB)

Jul 2018

- Software Engineer at the Security and Capitalization community, modelling an **API**.
- Worked on *Plug 'n Play* project, using Python (**Flask**).

STUDENT ORGANIZATIONS

TECS | CO-FOUNDER

Set 2017 – Present

- The group is focused on expanding exchanges between society and computing.
- Member of **TechShift Alliance**, global alliance of young leaders focused in proposing techlogies that generate positive impacts on society
- Participated in many projects, been the most notable ones **Digital Inclusion** and **Fundação Casa**.
- TA of **Law and Free and Open Source Software**, course developed by the group, 2020.

IMESEC | CO-FOUNDER

Jan 2017 – Dec 2017

- The group is focused in studying **cybersecurity**.
- Participated in competitions, such as Pwn2Win - *Capture The Flag*.

PROJECTS

- **Tuts Blog**: Blog build with *pelican* package, using **Python**, where I publish interesting things. Use **Travis CI** to deploy new versions.
- **RL-QLearning**: Application of *Q-learning* (Reinforcement Learning) on Gym (from OpenAI) environments, using Python (numpy, matplotlib).
- **Competitive Programming**: Solving many problems in competitive programming platforms, using **C++**.
- **DCGAN**: Application of DCGAN, used to build images of clothes. Used **Tensorflow** and **Keras** with Python.
- **Keras API**: Application of a API, build using ResNet model, to classify images. Used (**Flask**) and Keras with Python.
- **TutsVids**: Application using **React.js**, a video platform based on Netflix. Developed along Imersão React (React Imersion week).

AWARDS

2018 PIPA Award: Computer Science Department award, IME-USP

2015 Young Broker Challenge: 2^o place in a stock market simulation competition.

EDUCATION

UNIVERSITY OF SAO PAULO

Bachelor in Computer Science, emphasis in Artificial Intelligence and Data Science, IME-USP

Expected: Dec 2021

SKILLS

PROGRAMMING

Python • C++ • Scala
Java • Bash

TECHNOLOGIES

Git/Github • AWS • Linux
Apache Flink • Datadog • Scikit-learn
Cassandra • Kafka • Neo4J

LANGUAGES

Native Portuguese • Fluent English • Basic Chinese • Basic Spanish

EXTRACURRICULAR

INSTITUTIONAL

- Student representative, DCC-IME-USP, 2019
- Class representative, DCC-IME-USP, 2017-Present

VOLUNTEERING

- Professions Fair, USP, 2019
- Professions Fair, FEA-USP, 2017

ACTIVITIES

- HackathonUSP, USP, 2017
- Basketball Team, IME-USP, 2017
- FAAP Forum (UN simulation), Montessori School, 2015
- SIMED Forum (UN simulation), Montessori School, 2015

COURSERA

- Intro to Tensorflow, deeplearning.ai, 2020
- Mathematics for Machine Learning: Linear Algebra, Imperial College, 2020
- Foundations of Reinforcement Learning, University of Alberta, 2020
