EXPERIENCES

AMAZON | Python, AWS, Sagemaker, Bedrock, Java, SQL | Jan 2021 – Sept 2025, May 2026 – Current

Applied Scientist II (May 2026 – Current).

Data Scientist II (Jan 2023 – Sept 2025). Promoted from DS I. Developed ML models and pipelines (training and inference) for product matching, regression, and classification using Sagemaker and Python (Scikit, Pandas). Developed LLM and agentic AI solutions (Bedrock, CrewAI) across multiple projects with stakeholders across the organization.

SDE (Jan 2022 – Jan 2023). Designed scalable distributed systems with AWS (Lambda, DynamoDB, CloudFormation, CDK). Developed with Java and Python using CI/CD workflows. Experience with MLOps on AWS (Sagemaker, Athena, Glue).

SDE Intern (Jan 2021 – Dec 2021). Built end-to-end ETL pipelines with event-driven architecture and Quicksight. Focused on data engineering while completing AWS DevOps, Developer, and Architecting certifications.

IFOOD | Data Scientist III | Python, Langchain, Datadog, Databricks | Oct 2025 – Apr 2026

Worked on Ailo, an AI agent for food ordering via natural language (WhatsApp and iFood app). Implemented prompt decomposition for retrieval, dynamically constructing prompts based on request type to load only relevant business rules. Reduced token usage by 44% on retrieval, with \$462K in projected annual savings.

COBLI | Software Engineer Intern | Scala, Flink, Kafka, AWS | Jul 2019 – Dec 2019

Software Engineer at Big Data team. Developed streaming systems with Flink, Kafka, Cassandra, and Spark.

ITAÚ | Software Engineer Intern | Flask, Python | Jul 2018

Developed an end-to-end API using Flask at the Security and Capitalization department.

EDUCATION

UNIVERSITY OF SÃO PAULO (USP), MID 2024-MID 2026

Master's in Computer Science, Computer Vision, Face recognition with Transformer models, IME-USP.

UNIVERSITY OF SÃO PAULO (USP), 2017-2021

Bachelor's in Computer Science, Emphasis in Artificial Intelligence, IME-USP. Capstone project: Offline RL.

SKILLS

PROGRAMMING

Python • SQL • Java • Typescript • Scala • Bash

ML & DATA

Sagemaker • Pytorch • scikit-learn • Pandas • PySpark • Bedrock • Langchain

INFRASTRUCTURE

AWS (Lambda, DynamoDB, CDK, Glue, Athena) • Linux • Git • Flink • Kafka • PostgreSQL

LANGUAGES

Fluent & Native English, Portuguese • **Intermediate** Spanish, Chinese • **Basic** French

STUDENT ORGANIZATIONS

BEEDATA | Competitive data science, Co-founder | Sep 2020 – Dec 2021

Data Science competitive study group. Our YouTube channel with the content we produced (in portuguese). We used Pandas, sklearn, Pytorch in many activities. Semifinalists at Einstein Hospital Datacare competition (2020); Bronze at UFMG vs USP competition (2020).

TECS | Computer science for social good, Co-founder | Sep 2017 – Dec 2021

Most notable projects: Digital Inclusion and Fundação Casa. Member of TechShift Alliance. Attended TechShift Alliance Summit, University of Chicago, 2017. TA of Law and Free and Open Source Software, 2020.

IMESEC | Infosec and cybersecurity, Co-founder | Jan 2017 – Dec 2017

Attended to CTFs, studied attack and defense vectors for computer systems. We used mostly Linux and Bash.

AWARDS & CERTIFICATIONS

AWS Certified Cloud Practitioner, 2021

PIPA, Computer Science Department award, IME-USP, 2018, 2021

Semifinalists of Einstein Hospital Datacare competition; Bronze in UFMG vs USP competition, 2020

2nd place in Young Broker Challenge, 2015
